

UDAY SALATHIA

Pune, India | salathiauday@gmail.com | 7350940019 | www.linkedin.com/in/uday-salathia-6b13a11b5

PROFILE

Highly motivated Third-Year Computer Engineering student (CGPA 9.6) with expertise in Generative AI (RAG), AWS Bedrock, developing apps and DSA. Currently gaining professional experience in AI project management and AWS Bedrock implementation. Logic driven with proven leadership in technical clubs and a strong foundation in quantum computing and system architecture.

EXPERIENCE

Project Trainee Intern

Nihilent Limited | Pune

Jan 2026- present

- Implementing and testing Generative AI features using AWS Bedrock to solve real-world enterprise problems
- Contributing to project management and technical documentation
- Partnering with cross functional teams to make sure our technical builds solve the client's biggest pain points

Technical Lead

AR/VR Club GHRCEM | Pune

Sep 2025- present

- Experience in leading group projects
- Heading 20+ students in exploring new technologies and Unity-based development

Corporate Relations Lead

E-Cell GHRCEM | Pune

Aug 2023- Aug 2024

- Analyzed business models of 5+ local enterprises to deeply understand working

PROJECTS

CarAI – RAG-based Analysis System: Developed a Retrieval-Augmented Generation system that lets users chat with car datasheets to find specific technical details instantly.

- Integrated AWS S3 with AWS Bedrock's retrieve API to create a searchable KB for relevant data retrieval.

DormDrop – Student Marketplace: Engineered a full-stack web application (Next.js, Node.js) for college students to buy and sell pre-loved products.

- Implemented secure user authentication and a real-time product listing database using Supabase.
- Implemented an optimized way of storing messages and images without using too much storage. Along with successful hosting using a custom domain.

Quantum Circuit Simulator: Developed a web application for building quantum circuits using a drag-and-drop interface.

- Lead the project and implemented the core logic in Qiskit

Movie Recommendation System: Built a custom recommendation system using open-source LLM model- ollama to retrieve data from csv files. Reimplemented the same system using AWS Bedrock to compare the benefits of both the models.

- Users can enter queries to get recommendations to watch their next movie

RFID based attendance tracking system

- Attendance monitoring using RFID for college library
- Arduino Circuit logic and Server using python(flask)

SKILLS

Languages: C/C++, Python(Pandas, NumPy, boto3), SQL, Java, Javascript

AI & Cloud: AWS Bedrock, AWS S3, RAG systems, Qiskit, LLM integration

Developer Tools: Git/GitHub

Soft Skills: Technical Leadership, Project Management, Documentation, Teamwork

EDUCATION

B.Tech (Computer Engineering)

G H Raisoni College of Engineering and Management, Pune

2023-2027

CGPA-9.6

Grade XII

New Times International School, Pune

2023

95.6%

Grade X

Zebar School for Children, Ahmedabad

2021

95.8%

COURSES

C/C++ Course, Disha Institute
