EDUCATION

Gautam Buddha University

Bachelor of Technology, Information Technology

Aug 2022 – Aug 2026

Greater Noida, Uttar Pradesh

PROJECTS

AI-Powered Multi-Agent Financial Decision Support System | Python, Streamlit, yfinance

- Developed a real-time financial analytics platform using Python-based multi-agent architecture.
- Integrated live market data (yfinance) and implemented SMA, RSI, volatility, and drawdown indicators.
- Built a Streamlit dashboard for comparative stock analysis and risk visualization.

Agentic AI SQL Query Generator | Python, Grok LLM, MySQL, Streamlit

- Built a multi-agent AI system using Python and Grok LLM to automate SQL query generation and validation.
- Designed a 6-agent pipeline for schema introspection, query optimization, and error handling.
- Integrated MySQL for live execution and developed an explanation engine for business-friendly insights.

INTERNSHIP

Project Trainee Intern

March 2026 – June 2026

- Performed functional and comparative testing of an AI-powered RAG (Retrieval-Augmented Generation) chatbot, v
- Conducted comparative analysis of products from spacelabs and other different companies to evaluate chatbot performance and improve information retrieval quality.
- Gained hands-on experience with AWS cloud services including Amazon S3, Athena, AWS Glue, Lambda, IAM, and Amazon Bedrock.
- Developed and tested AI chatbot prototypes using foundation models available through Amazon Bedrock.

TECHNICAL SKILLS

Languages: Python, SQL

Technologies/Frameworks: Pandas, NumPy, Matplotlib, Power BI

Database: MySQL, Dynamo DB

Cloud: AWS (S3, Athena, Lambda, Glue, Bedrock)

Tools: Git, VS Code

AI Concepts: Generative AI, RAG Systems, LLM Evaluation, Prompt Engineering, Chatbot Testing

Achievements

CERTIFICATION

- Data Science with Python – Code with Harry
