Professional Summary

Project Trainee Intern with hands-on internship and academic experience in AI/ML, specializing in Retrieval-Augmented Generation, LLM evaluation, and prompt engineering. Proven ability to test AI chatbots and develop prototypes using AWS Bedrock, with exposure to AWS S3, Athena, Glue, and Lambda.

Technical Skills

Languages: Python, SQL

AI/ML: Generative AI, Retrieval-Augmented Generation, LLM Evaluation, Prompt Engineering, Chatbot Testing

Cloud: AWS S3, AWS Athena, AWS Lambda, AWS Glue, AWS Bedrock, IAM

Databases: MySQL, DynamoDB

Tools: Git, VS Code, Pandas, NumPy, Matplotlib, Power BI

Professional Experience

Company

March 2026 – June 2026

Project Trainee Intern

- Conducted functional and comparative testing of an AI-powered RAG chatbot.
- Evaluated product performance using AWS Bedrock foundation models.
- Implemented data pipelines with S3, Athena, Glue, and Lambda for retrieval tasks.

Projects

AI-Powered Multi-Agent Financial Decision Support System | *Python, Streamlit, yfinance*

- Developed realtime analytics platform with multi-agent architecture.
- Integrated live market data and visualized SMA, RSI, volatility indicators.
- Delivered interactive Streamlit dashboard for comparative stock analysis.

Agentic AI SQL Query Generator | *Python, Grok LLM, MySQL, Streamlit*

- Built multi-agent system to generate and validate SQL queries automatically.
- Designed six-agent pipeline for schema introspection and query optimization.
- Created explanation engine delivering business-friendly insights.

Certifications

- Data Science with Python – Code with Harry

Education

Gautam Buddha University

Aug 2022 – Aug 2026

Bachelor of Technology, Information Technology
